

“Conflict Materials from the Democratic Republic of Congo”

To whom it may concern:

In regard to the Dodd Frank Act (Section 1502) “Conflict Materials from the Democratic Republic of Congo”, Quartz Technical Services Ltd confirms that all Printed Circuit Boards manufactured at our facility with a lead free Hot Air Level finish contain no conflict materials.

The only material used on the circuit board's that is covered by the Dodd Frank act would be tin within the solder finish and the supplier of this material has confirmed that this is DRC Conflict free.

Kind Regards,

Neil Mousley
General Manager
